

CEILING ACCESS PANELS

Custom Polypropylene Lab Furniture

Plastic Concepts access panels are durable, non-corrosive, and chemical-resistant. They are designed for Biotech, Pharma, Hospitals, and other labs that require complete wash down sterilization.

Our custom made panels are securely fastened with easy-open latches and provide quick access to gas, liquid and electrical sources in your lab.

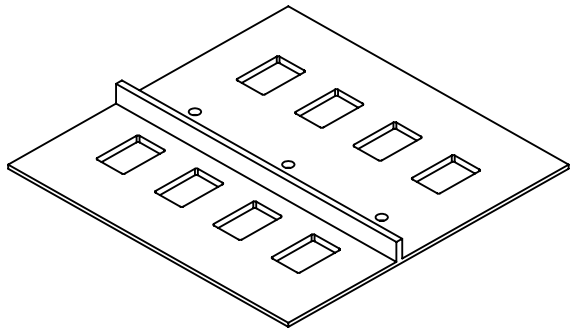

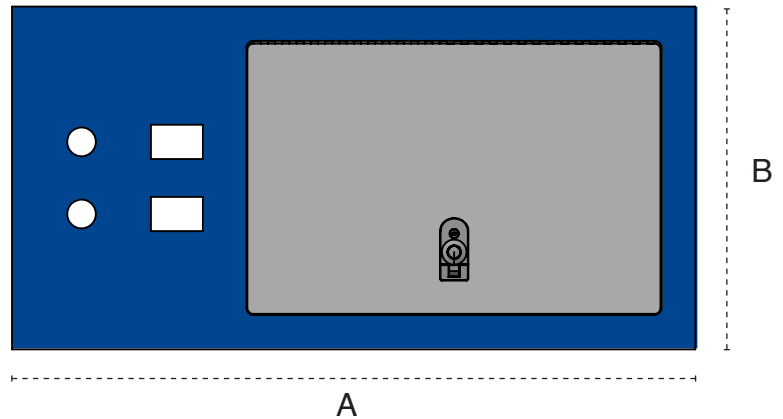

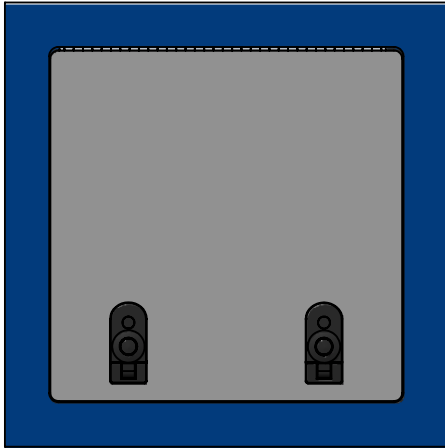

- Non-Corrosive & Chemical Resistant
- Complete Wash-down Sterilization
- Plumbing, Electrical and HVAC Utility Access

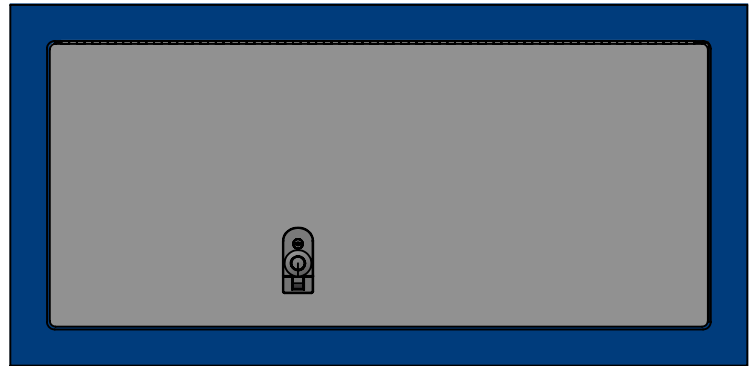

Custom Polypropylene Ceiling Access Panels

Plastic Concepts access panels can be completely customized to fit your existing ceiling or wall framework. Provide us with the dimensions and any other requirements and we'll take care of the rest.

Here are a few examples of custom projects we've done for our customers.

Removable panel - available solid or with penetrations

“Plastic Concepts was able to make a sturdy, non-corrosive access panel that fit right in to our existing ceiling framework. It was a quick, easy and affordable solution to what I thought would be a major undertaking.”
