

## SINGLE-USE TECHNOLOGY

Custom Lab Essentials

More and more companies are recognizing the benefits that single-use disposable technology provides over permanent stainless steel products.

Plastic Concepts Single-Use Disposables can be customized for your specific needs and processes. Our designers and project specialists will work with you to find a solution to save you time and money.

### Custom:

- Caps
- Dip Tubes
- Carboys
- Bottles
- Rigid Manifold Piping
- Funnels
- And more...

## Custom Lab Accessories

Plastic Concepts will work with you to create custom solutions for your particular processes and find the best way to create efficiency and productivity in your lab.

Our single-use accessories can be fabricated with the material best suited for your individual application needs. We offer: polypropylene, polyethylene, PVDF, Teflon, and polycarbonate.

### Our Products Can Be Customized To Meet Your Specifications
